Personalization

Packaging

Each box we can prepare in any size or colour. As a result, we have a perfect packaging adjusted to the client's individual needs that will surely delight endowed persons.

Cards

Printed cards we can place inside a box or tie it on a ribbon. A card is something that always warm up and personalize a gift.

Cover

A cover is made of a decorative cardboard and is a perfect alternative to a new packaging pattern. It's a less costly way of decorating, but still offering wide range of gifts personalizing possibilities.

Ribbon

We propose satin ribbons, that are ideal to sign by sublimation method allowing for multicolour printing Pantone. Another alternative are effective rep tape that might be personalized by a one colour logo in a screen printing method. Elegant ribbon is a perfect complement to any packaging.

Embossing

We can emboss any logo or graphics on chocolate boxes by a 'dry' method or with the use of foil. Hot stamping helps to create real pieces of art.

Engraving

We engrave a wooden box by laser. That precise method allows to engrave not only a logo, but also wishes or any other effective decorative inscriptions.
